Education

York University

Toronto, ON

August 2017 – Dec 2019

- BA in Information Technology

Centennial College

Toronto, ON

Sept 2015 – May 2017

- Diploma in Software Engineering

Experience

Knayo Technologies - Software Developer

Toronto, ON

May 2019 - present

- Developed, designed, and launched a visitor management system.
- Communicated with clients to collect requirements and described product features.
- Analyzed requirements and designed the process flow of the system.
- Developed the application using PHP and MySQL database.
- Used expertise in SDLC and core Java technologies to create desktop application to meet client requirements.
- Performed JUnit and integration testing.
- Developed efficient algorithms and utilized various data structures such as Linked Lists, Arrays, Queues, HashMap in Java.
- Utilized Git and GitHub for version control management.
- Utilized Java features such as Collections and Exception Handling mechanism.

Projects

Sorting Algorithms Visualizer

Web app in React

<http://dhruv9979.github.io/Sorting-Visualizer>

- Visualized Merge Sort, Quick Sort and Bubble Sort by using bars representing randomly generated arrays.

TalkBox Pro

Desktop app in Java

- Developed integrated consumer applications for speech impaired people using JAVA
- Utilized Git and GitHub to maintain version history of the code
- Created test plans and developed test code for unit and integration testing
- Analyzed and fixed the bugs identified by the users

Vidly

Video Rental app in ASP.NET

- Wrote clean and organizable code using MVC.
- Learned to use migrations and Data Transfer Objects (DTO) and how it helps in implementing code first approach.
- Built RESTful Web APIs and tested them on Postman
- Learned importance of View Models when passing data between controllers and views.
- Implemented third party login functionality using Facebook, Google+, etc.
